

Foundations for Designing the Perfect Protocol

Be sure to build a proper foundation and eliminate co-infections from the beginning. Additional targeted support can be added as needed to address concerns or other primary presenting symptoms.

Adrenal/HPA/Stress Handling Support

- | | | |
|----------------------|-------------------|--------------|
| • Adrenal Tonic | • Eleuthero | • Nevaton |
| • Drenamin | • Kava | • MinTran |
